ETC.

EVERETT, WASH.

## READ! CONSIDER! ACT!

Because you want to learn about our way of selling Lumber, Shingles, Millwork, etc., we know you must be a man with progressive, up-to-date ideas and that you are always looking for a chance to get ahead.

We're glad to explain as well as we can about the **New, the Up-to-Date** way of selling Lumber, Shingles, Millwork, etc., and we want you to carefully read and think over our plan of selling—then try us once with an order—you'll get **Satisfaction**.

Live, up-to-date men everywhere are buying our Lumber, Shingles, etc., every day. It's simply growth—a **Great Step Forward!** It's the saner and more economical way of buying your building needs. It **Puts a Stop** to paying out the large profits and expenses of the Retail and Line Yard Companies.

Serious, far-seeing men everywhere are readily taking up the "Direct from Mill to You" way of buying Lumber, Shingles, etc. It's a plan they'd long been waiting for.

**Many of our Customers say that they have Saved from 15 to 50 Per Cent.** by buying their building material from us, instead of buying from their local yards.

We are located in the heart of the largest lumber manufacturing district in the country, and we use only the best lumber in the manufacture of our millwork.

Because our prices are low, do not be led to believe that our goods are cheap. They are up to the standard grade in every way, clean, merchantable goods, sold at low prices, because of our ability to handle large quantities.

It is not necessary for us to explain in detail about the goods we are selling, because most people know that all lumber, shingles, sash, doors and millwork are made and graded according to standard rules. **We Guarantee** all of our lumber and other stock to be fully up to the standard grades of the West Coast Lumber Manufacturers' Association.

**Fir** is a wood that can be put to many uses. It is the strongest softwood known and for this reason is especially useful for framing lumber of all kinds.

**Fir Finish**—We make a specialty of Fir Finish. Because of the handsome color and grain of Fir, which can be given a high polish, it is used very largely for finish in all kinds of work. Our timber is old growth Yellow Fir that is soft and mellow—we know that it will please, for the stock will "stay put" when placed in a home. We dry it slowly but thoroughly and on this account the pitch that is natural to the wood is extracted and any desired finish or stain may be given the wood.

**Sash, Doors, Millwork**—All of our Sash, Doors and Millwork, are made from thoroughly kiln dried Fir Lumber, constructed in the best manner possible and are built to last.

**Red Cedar** is one of the most lasting of woods and Red Cedar Shingles will make the Roof of Ages. Nobody knows how long they will last when properly put on with the right kind of nails, either cut or zinc. Red Cedar Shingles painted or unpainted, stained or unstained, will outlast all of us. It pays to use them.

**Quality**—In our grandfathers' day, all lumber was whip-sawed, hand dressed and hand worked—that meant quality but high cost. Our up-to-date machinery gives you better quality at a less cost.

**Quality will Win** in the long run—that's the principle we had in mind when we started in the lumber business years ago and the many repeat orders we are getting prove we are right. Our lumber, shingles, etc., are of truly good grades and better than might generally be required, but that explains why people again want our stock after once seeing and using it.

**Time of Shipments**—For shipments going to points east of the Rocky Mountains and west of the Mississippi River it is best to figure that it will take about four weeks for you to get the material after the order is received by us. Many times shipments go through in much less time—but it is better to order early and get the lumber a little ahead of time, rather than not having it on hand when you are ready to use it. When there is no car shortage, we load many shipments in two to four days after the order is received unless order has special millwork. When car is loaded we arrange to have the car followed through with wire tracer so as to get the very best delivery possible.

**Carload Shipments Save You Money**—To get your building materials at the lowest prices it is necessary that you send in orders for carload lots, because the local freight rates are usually from three to six times as much as the carload rates. The railroads require that we must load not less than 34,000 pounds in their smallest cars. This means that the material for an average sized 5-room house, or the material for a barn 30x40, will make weight for a small car. Large bills can be loaded in large cars or in two or more cars as found necessary.

Should your bill not be enough for a small carload you can easily get one or more of your neighbors to order with you and have it all shipped together. We have shipped as many as fourteen (14) different orders in one car and our customers have all been pleased with the way we have handled their shipments.

**Special Lumber and Detail Millwork**—We are glad at any time to make you a price on any special lumber or odd millwork that you may need, that is not given in our price list or catalogue. Our prices on this material are low and we are in position to handle orders for this special work promptly.

**Safe Delivery Guaranteed**—All Lumber, Millwork, Shingles, etc., is carefully loaded and packed, and we guarantee safe delivery to any railroad station.

Always inspect carefully your goods before taking them from the car. If anything is broken, scratched or missing, or bundles appear to have

been tampered with, call the attention of railroad agent to the matter then and there. Don't accept the shipment until agent writes a clear notation of the damage or shortage on expense bill showing exact condition of goods. After agent has made this notation, you may then accept goods and avoid storage charges. All our goods are packed and crated carefully and if they reach you in bad condition, it is the fault of the railroad. Do not let them convince you that it is due to poor boxing.

If your shipment is damaged or anything short, send us your expense bill with notation of damage or shortage, as explained above, and we will pay the damage or duplicate shipment. We will do this only where you return freight bill with agent's notation.

**Plans of Payments**—Our terms of sale are made so that they will protect you in every way. Our three different plans are all meant to make it easy for you to do business with us. Read them over carefully—then pick out the one that suits you best.

**1st—Cash With Order Plan**—Many of our customers know the kind of material we are shipping and are glad to pay the full amount of their order in advance—to them we give a special cash discount of 2 per cent which is a worth-while saving.

**2nd—No Cash Down Plan**—You do not need to pay us one cent until five days after arrival of the material. In this way you can unload the car, count the stock and see just what you are getting. Just have your Banker fill out the guarantee we enclose and send in with your order.

**3rd—C. O. D. Plan**—Send us 15 per cent of the full amount of your order and upon receipt we will ship your order with Bill of Lading attached to Draft for payment of the balance after you pay freight, five days after receipt and inspection of the goods.

We must ask that our customers use one of the plans of payment given above, as we do no credit business—for by doing business on the fair and square plans given above and keeping strictly to them, our accounts are kept in good shape, and you are not compelled to help pay for losses caused by bad debts of others.

**Our Prices**—All the prices given in our catalogue are delivered on cars at the mill and do not include freight charges to your station. Because of the many different freight rates to different points we are compelled to name prices at the mill without freight. Just write us and we'll be glad to name you a delivered price to your station on any of our plans or on any bill of Lumber, Millwork, etc., that you send us.

**Information**—Your request for information about anything connected with our business will receive prompt and careful attention. Any time that we can be of service in any way we only ask that you write us, and we'll do our best to treat you right.

### BEFORE YOU BUILD

You should have a complete set of plans and specifications. Don't rely upon the rough sketch of an inexperienced carpenter. It may look good and seem cheap but costly errors caused by this way of building may make your building cost you a great deal more than the original estimate.

Secure the services of the most reliable carpenter or contractor in your community. He may not be the cheapest but you will have the satisfaction of knowing that you will get full value for every dollar you spend. Remember the cheapest is not always the best.

By having plans, specifications and a contract, you will know just what your house is going to cost. With these plans, etc., your carpenter or contractor can give you an intelligent estimate of the cost of construction.

See that all material entering into the construction of your building is exactly as called for in the specifications and that everything is properly protected from damage of any kind, both before and during building operations.

**Our Architectural Department**—We maintain an architectural department for the service of our customers.

Those in charge of this department have had several years' experience in this line of work. It is always their aim to design standard, substantial, home-like houses, giving the maximum of room at the minimum of cost. We are not in the business of selling plans, but operate this department solely for the use of our customers.

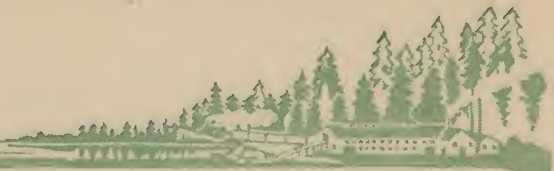

Our complete plan and blue print outfit consists of:

- |                             |  |
|-----------------------------|--|
| 1. Basement plan (if any).  | 6. Right Side Elevation.                           |
| 2. 1st Floor Plan.          | 7. Left Side Elevation.                            |
| 3. 2nd Floor Plan (if any). | 8. Detail Sheets.                                  |
| 4. Front Elevation.         | 9. Specifications.                                 |
| 5. Rear Elevation.          | 10. Guaranteed material list with delivered price. |

You may want to make a study of one of our sets of Blue Prints of the design of house that you are going to build, and we will send you items No. 1 to 9 of the above outfit upon receipt of \$5.00. This \$5.00 will be paid back to you when we receive your order for the house you want, and the plans become your property without any cost to you. We also send material list telling just where the different items are to be used, when we ship your order.

**Our Stock Plans**—These plans are carefully prepared by experienced and practical architects who have for years been building and designing this class of homes. The greatest care has been taken to work out every detail. Our customers who have used our plans, tell us that they have found our material bills complete to erect the buildings with a minimum

of waste. This means that you will get enough stock to finish your building completely at a minimum cost.

**Reversed Plans**—The plans we show have been designed to give as much room, comfort and convenience as possible. However, your building site may require that the plan you want will have to be reversed from the way shown in our catalogue; that is, the arrangement of the rooms, etc., should be just the opposite from the position shown in our stock plans. We'll make these reversed plans at an additional cost of \$1.00 or a total of \$6.00 for the set. This will be refunded to you when we get your order for the Lumber, etc. These reversed plans will be redrawn, so that reading matter, dimensions, etc., will not read backward, but will be plain and easily understood.

**Your Own Plans**—The few plans given in our catalogue will be increased from time to time whenever we find a practical, standard and comfortable building. However, we want you to remember that our architectural and estimating department is at your service, should you want a different plan than those shown. This department can also be of service to you if you contemplate building stores, warehouses, schools, churches, etc.

**How to Get Special Plans**—Send us a sketch showing the arrangement and size of the rooms on the first and second floor, giving height of each story, also a sketch showing the kind of roof you want. Remember the more information you give us the easier it will be for us to know what you want. You may have everything so thoroughly in mind that it seems perfectly clear to you, but all the information we will have is what you give us.

When you send us this sketch and complete information, we will make a pencil drawing for you of plans drawn to scale, following your suggestions as far as practical, and telling you exactly what the lumber and millwork will cost you delivered at your station. For this work we charge \$1.50 per room for the main rooms of the house, not counting closets, halls or bath. Payment for this work should be sent with your sketch and description.

When you receive our drawings, you can check them over and make any changes or suggestions you wish, and return same to us, when we will make up the finished plans and Blue Prints for which we will charge you an addition of 50c per room. This will make the completed plans, blue prints, specifications, etc., cost you \$2.00 per room, which is a very small charge for this service.

Please remember that this deposit will be repaid to you when you buy your lumber bill from us, and you can take it off of your remittance when you pay our bill.

The plans, specifications, etc., according to your ideas will be complete working blue prints necessary to construct the building.

### WHAT WE FURNISH

**All Foundation Lumber and Framing Material** including sills, girders, joists, studding, rafters, plates, etc., is No. 1 Common Fir.

**Roof**—1x6 No. 1 Common Sheathing Boards, random lengths, enough to lay roof close without spaces. Extra Star "A" Star Red Cedar Shingles (unless otherwise specified or agreed).

**Wall Sheathing and Floor Lining**—1x8 No. 1 Common Shiplap.

**Finish Floors**—1x4 No. 2 Clear Vertical Grain Fir Flooring for the first and No. 2 Clear Vertical Grain Flooring for the second floor.

**Siding**— $\frac{1}{2}$ x4 or  $\frac{1}{2}$ x6 "A" Red Cedar Lap Siding, or Extra Star "A" Star Shingles, whichever is called for in specifications.

**Outside Finish**—All outside finish including porch columns, newels, rails and balusters, all cornice material, barge boards, brackets, material for front and rear steps, all other finish material to make a complete job.

**Inside Finish**—All inside door and window trim, base, picture mould, and any other material necessary to finish inside of house. This material is selected Yellow Fir, especially adapted to this class of work. (Note: Our inside finish is machine sanded, which saves you much work.)

**Lath**—No. 1 Fir Lath, 4 Feet.

**Doors**—Outside doors  $1\frac{3}{8}$ " or  $1\frac{3}{4}$ "; inside doors  $1\frac{3}{8}$ ". Kind and grade as specified in plan selected.

**Windows**—All windows  $1\frac{3}{8}$ " thick, glazed single or double strength as specified in plan selected.

**Frames**—Door and Window Frames complete, shipped knock down. Outside Casing regular  $\frac{13}{16}$ ". Moulded cap, (see details in catalogue).

**Building Paper**—We furnish building paper to lay between floor lining and finish floor, also between sheathing and siding.

**Plans and Specifications**—With every bill of material purchased from us, from designs shown in our plan book, we furnish a complete set of plans and specifications, also a material list showing where every piece is to be used. This is furnished without extra expense to you.

### WE DO NOT FURNISH

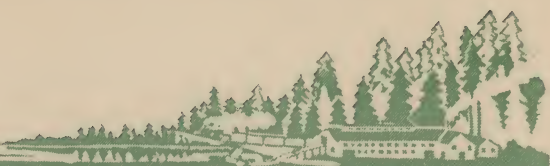

Hardware, paint, varnish, heating apparatus or plumbing supplies. Neither do we furnish any part of concrete foundation, chimneys or plaster.

### SPECIAL NOTE

You will notice we have specified the grades of all the material of the best. Should you want to build according to one of our plans and find the price a little more than you want to pay, we will be glad to figure the bill in material that will not cost so much and at the same time give you a good serviceable building.

**Our Guarantee**—We absolutely guarantee to furnish enough material, as specified in our material list, to erect each house according to our

plans and specifications. If for any reason there should be a shortage of material through breakage in transit, or error on our part, we agree to make good such shortage by replacing same or allowing our customer to purchase same at our expense.

We further guarantee that all material we furnish will be exactly as represented by us. Lumber and Shingles will be up to the standard grades of the West Coast Lumber Manufacturers' Association—if not so found, we will replace same without further cost to our customer.

We also agree to furnish an itemized invoice showing exactly what is included in each shipment. If, after checking the material against this invoice, a shortage is found, we will hold ourselves responsible.

### SOME SUGGESTIONS TO GET A GOOD JOB

Soaking lath well in water will prevent the plaster from cracking.

Use galvanized or zinc shingle nails and you will more than double the life of your roof. It isn't poor shingles that cause a leaky roof. The trouble may be caused by improper laying, but more often when a roof leaks after being in use for a comparatively few years, the trouble is caused by the rusting away of the common wire nails generally used. This allows the shingles to fall out, thus opening a hole in the roof that may cause endless trouble.

All outside finish should be primed as soon as put in place to prevent checking.

Joists should be properly bridged in all spaces 10' 0" and over.

All openings over doors and windows should have double headers. If openings are over 3' 0" wide they should be trussed.

As soon as the frame is up the building should be protected by insurance.

### HOW TO ORDER

When ordering lumber, millwork, etc., from our lumber price list and millwork catalogue, please follow the suggestions given below and it will help us in giving your inquiries prompt and careful attention:

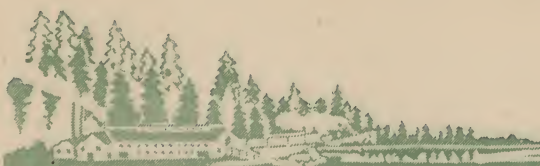

1. When ordering lumber always give the grade if possible, and use the grade names shown on our lumber price list. If you do not know what grade to order, tell us what it is to be used for and we will use our best judgment and give you the grade suitable for that purpose.

2. Always give the number of pieces or the number of feet, also the thicknesses, widths and lengths of the stock.

3. Please remember that we will furnish timbers and dimension in just the lengths you want, but we suggest that you allow us to ship random lengths in Shiplap, Common Boards, Flooring, Ceiling, Finishing, etc., because in this way you save money. If you must have special lengths for some special purpose, we can furnish it at an additional cost.

When ordering Sash or Windows, always give the **width** first and then the height.

Remember the term "sash" means just one piece, the term "window" means two pieces, one upper and lower sash.

When ordering Windows, give the size of the glass and the number of lights. Also give the thickness of sash and say whether check or plain rail.

When ordering Sash, give the size of the opening to be filled, or say whether the size given is the size of the glass or the outside measure of the sash.

If more than one light is wanted in the sash, send sketch showing how sash is to be made.

#### CLOSING NOTE

In closing, will say that there are many people who get to the starting point but very few of them really get on the way. Then some of the weak ones drop out, others stop to talk about some short-cut, others lack a will to go on, and at the end it is the "survival of the fittest."

The way to win is to go through to the end.

Our prices are as close as it is possible to make them, quality and service considered.

We guarantee the quality and full measure of our goods, and will make good anything that is not according to our guarantee or agreement.

We can't prove this to you until you give us a chance to do so. Give us a trial.

To serve you,

THE H. LANSDOWN CO.

## HERE'S WHAT OUR CUSTOMERS SAY—

### WASHINGTON

J. A. Taylor, Withrow—Everything on the bill was received in good shape and all (to use a common expression) fine and dandy. All finish lumber fit for a King's Palace.

H. G. Immel, St. Andrew—Lumber all here and all O. K. The "Special" Shiplap is surely fine and everything O. K.

J. C. Peterson, Farmer—Your letter at hand and am glad to say that I am well satisfied with your lumber. I think it is the best I have seen in the Northwest.

### IDAHO

Mrs. Chas. H. Russell, Kellogg—The shipment was O. K. and will not forget to spread the news and do a little advertising for you. Thanking you for your promptness and accuracy, I beg to remain for further business.

Lind Bros., Idaho Falls — Enclosed find check No. 1030 together with the freight receipt to pay for the materials we have received on your estimate No. 2008. We are well pleased with the materials and hope to soon order again.

### WYOMING

"The material was all O. K. and as for grade, I am more than pleased, better than I expected. Besides, the saving I made was no small thing. You may look for another order soon."—(W. A. Foote, Lovell, Wyo.)

"I feel it my duty to thank you for the prompt and complete system that you delivered my car of lumber. I must say that I am well satisfied with the lumber, it is better than I expected to receive, for I had been told that I could not depend on any of the lumber companies that furnished the whole bill for a house. I know now that a person can rely on the H. Lansdown Company."—(J. H. Neville, Byron, Wyo.)

"Car arrived July 3rd. Haven't got it all unloaded yet, but what I have unloaded sure is fine. Everybody that has looked at my lumber says that it is something new to them to see such good lumber in this part of the country."—(A. R. Melloy, Lingle, Wyo.)

### MONTANA

John Langwald, Fairfield—15 days after you shipped the lumber I had same in Bole, Montana. Everything was O. K., the lumber was better than I expected, the millwork extra good. Will send for another carload this fall. \* \* Thank you for the good material and service.

C. A. Ettles, Plevna—We have received the two cars of lumber and find everything so far very satisfactory and consider we have made a saving of at least \$10.00 per thousand.

Geo. E. Blauvelt, Plevna—I want to say I am well pleased with the quality of lumber you shipped for Mr. C. A. Ettles of this place. The quality and price made the neighbors take notice and the local lumber men howl.

R. C. Zink, Webster—Your records will show that I interested four different parties in buying a carload of lumber from you in 1914 and we found we saved \$8.00 per M and got better material.

A. O. Nicholls, Buffalo—The car of lumber arrived and we have it unloaded and partly into the barn. I am very much pleased in every way with it and that is putting it mild. My carpenters are old heads at the business and they say they never worked on a nicer bunch of barn lumber. It all checked out correct so everything is O. K.

L. H. Bauer, Highwood—Will say the lumber is all O. K. Am well pleased with the deal. I ordered No. 3 Flooring for Barn which is as good as No. 2 in local yard. Sheeting is as good as best boards here. Shingles are all right. I invite everyone that comes along to look at the stuff I got.

F. J. Rethely, Highwood—I was not able to take more than a casual look at the car of lumber and posts until yesterday. I had it unloaded by draymen as I was too busy getting in Spring crop. It is all you claim for it as to quality, and has saved me about 25 to 30% on the lumber. Am much pleased and will do all I can to get others to order from you.

### NORTH DAKOTA

Christ Smith, Huff—Would say I am well pleased with the car I got last spring, and also this last one. Saved over \$200 on the two cars.

Jas. G. Doyle, Schafer—These two bills at the yards at Watford City cost \$220.70 more than your figures. Don't you see why we are on the warpath?—and myself saved \$206.25 and got better grade and better posts and had what we paid for when we got home.

Math. Thompson, Ambrose—I am more than satisfied with the bill of lumber I received from you. I have at least saved \$150 on the bill, and I have also endeavored to get you several more bills from this point, and you can look to me for the future as a customer.

Joseph C. Falven, Watford—Your prices are a revelation to us being 25 to 40% lower than the Retail Yards here.

### SOUTH DAKOTA

Tollak Tollefson, Bonilla—We received the car of lumber, it got here last Saturday, April 19, so it sure made a quick trip. I think this last load of lumber we got from you is the nicest car of lumber that has ever been unloaded at this place. I have been building and handling lumber for the last fifteen years, but I don't think I ever handled a nicer lot of lumber than this, and your prices is from 25 to 30% less than here at home.

J. D. Dibble, Hilland—Your letter received containing receipt for payment of lumber bill. I find the lumber very satisfactory and fully up to grade. I saved \$100 on the barn bill alone from prices quoted me by local firm.

### NEBRASKA

"Everyone that has seen the lumber says it is the best that has ever been shipped to this country. Several have gotten your address and others that are going to build say they want it. Of course the lumbermen here are somewhat displeased but I must say I am perfectly satisfied with the lumber, and appreciate your square dealing and promptness. If I am able to do you a favor I will gladly do so."—(John Craig, Sunol, Nebr.)

### MINNESOTA

"The carload of lumber that I ordered of you some time ago I have received and unloaded on Thursday, March 11th, and I have found everything O. K. and a little more than 'Better as I expected' and am fully satisfied with same. According to the Local Lumber Dealers' prices I have saved at least \$150.00 on this carload alone."—(John A. Willenbring, Richmond, Minn.)

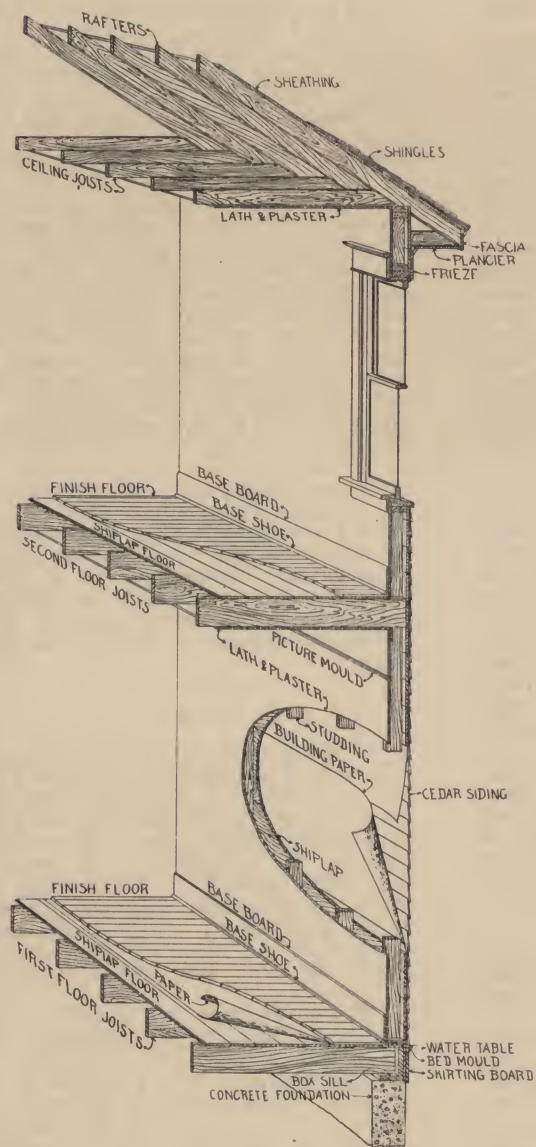

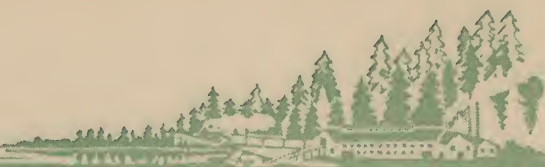

"The carload of lumber you sent me arrived O. K. and in unloading same I found it to be of excellent quality. As this was the first carload of lumber shipped to this point that hasn't gone through the regular channels of the lumber trust at least one of our local dealers made a noise loud enough to wake up the dead because they thereby lost a profit of from \$100.00 to \$150.00."—(H. P. Skorstad, Georgetown, Minn.)

"Some weeks ago we members of the 'Equity Farm Club' sent you an order for shingles, siding and millwork. Arrived here two weeks after leaving Washington. Everything O. K. We have two large sawmills in Bemidji, but saved 40 to 50% by sending order to you."—(Albert C. Graf, Bemidji, Minn.)

### IOWA

"I want to thank you for the fair dealing and promptness in handling my bill of lumber. Everything checked out O. K. and the quality is extra good, in fact much better than I expected. I consider the shingles are as good as they make them. If I ever need another bill of lumber I surely will send to the West for it. Will always say a good word for you."—(From Jno. L. Harris, Morning Sun, Iowa.)

"I will try and find neighbors who will want lumber and shingles. In doing this I am trying to repay you for the treatment you gave me on my load of lumber ordered of you last Summer. Everyone who saw the lumber said it was much better grade than could be bought at our local yards and I saved \$200.00 on my barn."—(John Baker, Grand River, Iowa.)

### Method of Construction Used in Our House Plans

This picture shows the general method of construction used in all our houses, and together with our very complete blue prints makes it easy for you to erect any one of the buildings illustrated in this catalogue.

THE WILDWOOD

No. 301—22x26—8'-6" Ceiling.

It often happens that when a man is starting on a new place it is not convenient for him to build a large house when he has so many other buildings to erect.

For this reason, we have been asked time and again to furnish plans of a good three-room house which can be built quickly and at a low cost.

After trying many small plans in actual construction we have decided that this little plan is the best.

The arrangement is good. The exterior presents a very neat appearance. Either shingles or cedar siding can be furnished at the same price.

THE EVERGREEN

No. 401—SIZE 24x28—8'-4" Ceiling.

Can you give any real reason why a small house should be any less attractive just because it is small? It takes no more lumber and labor to build a pleasing house than an ugly one.

Several of our customers have used this plan and all are well pleased with it.

A nice large kitchen and living room are special features of this house. Also the convenient arrangement of the bed rooms and bathroom. Both bed rooms have a good clothes closet.

The pantry provides good storage space.

The artistic little front porch gives a tone of distinction to the whole exterior.

THE ELMWOOD

No. 402—SIZE 24x28—8'-4" Ceiling.

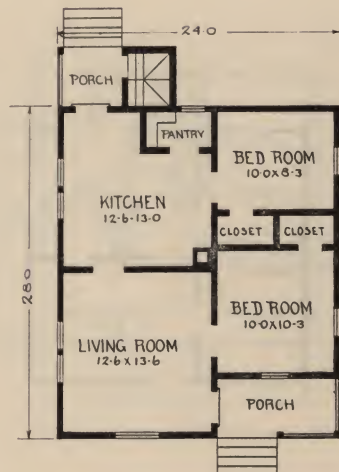

Another little house which gives you good value for your money. It is one of our best sellers.

There's not much fancy work about it—just solid and substantial looking.

The daylight rooms, the kitchen and living room, are both large and light—while the bed rooms are of good size, each with a large closet.

You get into the basement by a stairway leading from the back porch.

For a small inexpensive house, don't you think this plan is one of the best?

THE FERNDALE

No. 404—SIZE 24x26—9' Ceiling.

A house of moderate cost, homey and convenient.

The living room is cozy and well lighted, and both sleeping rooms have the light and ventilation so necessary to good health. Each bed room also has ample closet room.

The convenient work table and cupboards in the kitchen need only to be used to be appreciated. There is also a large pantry with plenty of shelf room, and the useful rear porch.

With our excellent materials and sturdy construction a house like this will be very serviceable. Simple in design and yet pleasing in its simplicity—just the home for a small family.

THE EDGEWOOD

No. 405—SIZE 26x30—9' Ceiling.

In these days of high costs, simple lines and service count.

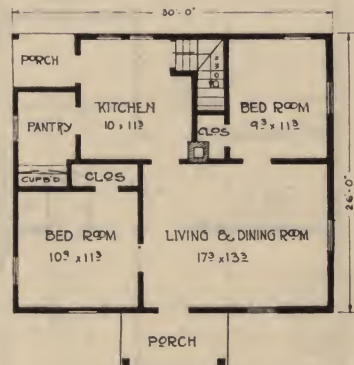

That's what our architect has tried to give you in this little home.

You will surely enjoy the large living room—which becomes in many homes the center of the home life.

Then the kitchen, where the worker of the house spends so many hours, is well arranged for service. If you do not have a basement the space taken by the basement stairway can be used in either kitchen or bed room to good advantage.

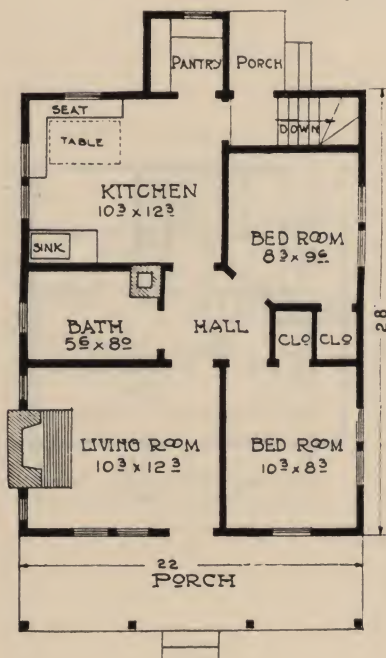

The porch at the rear is a protection to the back entrance appreciated by many a busy woman in stormy weather.

You'll get value received for every dollar you put into this home.

THE SEASIDE

No. 406—SIZE 22x28—9' Ceiling.

What a lot of house for a little money!

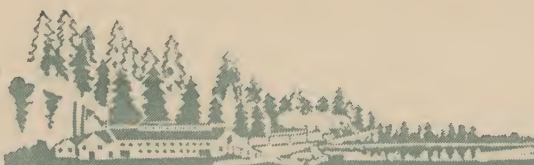

Notice the porch built under the roof of the main house, making the house look larger.

The whole interior arrangement is compact and planned for comfort and convenience. Then notice the number and location of the windows and you'll see that you can get plenty of good light and ventilation in each room.

The kitchen and bathroom are so arranged that the plumbing can be put in at a minimum cost. The corner seat and space for the table in the kitchen mean so much less work for the busy woman.

The neat outside and the cozy inside will surely give you pleasure and service.

THE BONNIE BRAE

No. 501—SIZE 28x36—9'-4" Ceiling.

The artistic porch with a pergola on each side, combined with the attractive arrangement of the bungalow windows, makes this a home of charming distinction.

The interior is just as pleasing—with the well lighted living room and dining room connected by a colonnade, which makes them practically one large room. Note the good arrangement of the two large bed rooms with bath between, all of which are reached from the dining room through the hall—in this way giving the needed privacy to this part of the house.

The basement is conveniently entered either from the kitchen or from the outside grade entrance.

Do you think any more conveniences could be offered in any home of its size than given in this plan?

THE HOLLYWOOD

No. 502—SIZE 26x34—9'-4" Ceiling.

Here is one of the most popular plans in our catalogue.

It has been built a great many times, and is planned for those who want a moderate priced home with lots of room. Just notice that every room has at least two windows, so there's plenty of light and ventilation.

The home-keeper will appreciate the large wall spaces in the bedrooms, which permit a good arrangement of the furniture.

The kitchen is small and well arranged, while the dining room and living room with the cased opening between are practically one large room.

Should you build by this plan, you will say you received your money's worth.

THE ROSELAWN

No. 503—SIZE 24x42—8'-6" Ceiling.

Here is a complete five-roomed bungalow with many good points.

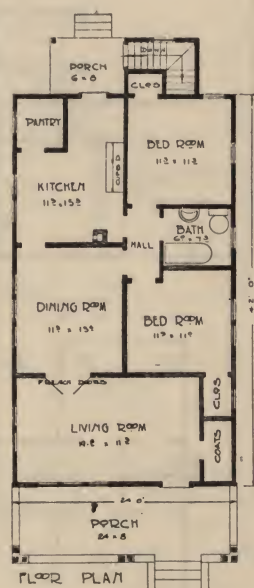

Every room is larger than usually found in a house of this kind and allows the space so many people need to have real comfort.

When you enter the large light living room there is a closet for wraps close to the door. Then a pair of French doors gives a pleasing view of the dining room.

The bedrooms and bathroom are reached through a small hall opening from both the dining room and kitchen, making the work of the home keeper easier. The closets are roomy and convenient.

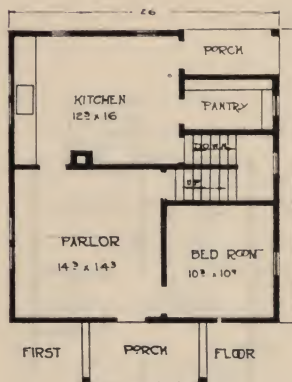

A stairway leads from the rear porch to the basement.

Think about these good points and you'll know why it is just right.

THE HOMESTEAD

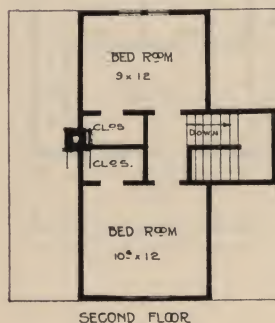

No 505—SIZE 26x28—9' Ceiling first floor;  
8' Ceiling second floor.

Those wanting a plain five-room story-and-a-half house of moderate cost are sure to be pleased with this design.

The kitchen is of ample size to be used for the family dining room also, which saves the hard-working mother many steps.

The sleeping rooms are of good size and with ample bed space in each.

Those wanting a home without frills and unessentials will be pleased with this simple design.

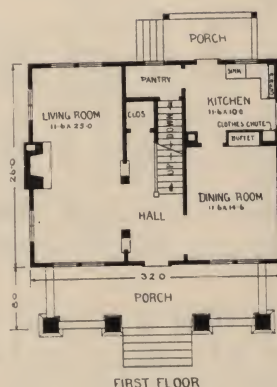

### THE HIGHLAND

No. 601—SIZE 32x26—9' Ceiling first floor;  
8½' Ceiling second floor.

Here's a home. Look at it from every standpoint and it seems to invite you to enter and find the real comforts of home.

The large, well-lighted living room with fireplace, the dining room separated from the hall by French doors both speak of home enjoyment. The real housewife's kitchen is well arranged to save her labor.

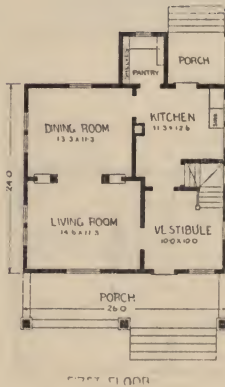

On the second floor there are three nice bed rooms with large closets, and a very convenient sewing room. The bathroom has a convenient linen closet and clothes chute leading down through the kitchen to the basement.

This is a real home for home-loving people.

### THE NORTHWOOD

No. 602—SIZE 26x24—8'-6" Ceiling first floor;  
8' Ceiling second floor.

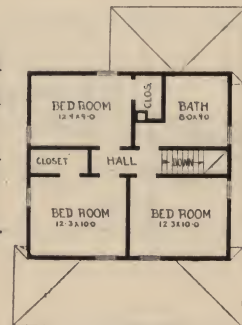

Does the substantial appearance of this house with the broken roof lines and heavy overhang please you?

When you look at the inside you'll like the appearance of the living room, joined by a colonnade to the dining room. This makes both the rooms larger. The kitchen and pantry are arranged to save steps for the busy woman.

There is no waste room on the second floor with its three large bed rooms and bath all opening on to the hallway.

A full basement is planned which makes plenty of room for furnace, laundry and vegetable room.

This makes a substantial house of good appearance.

THE RIVERVIEW

No. 603—SIZE 28x44—9' Ceiling.

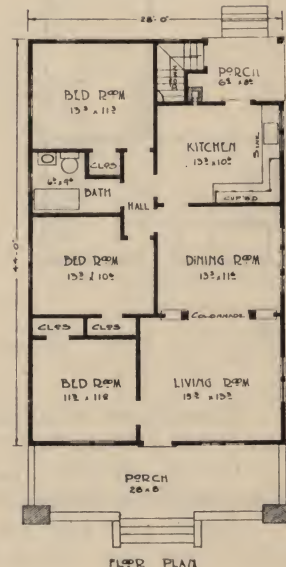

A delightful house with a clever floor plan.

Notice the long sweeping roof which also extends over the porch—broken by an artistic dormer in keeping with the general scheme of the house.

Then as you enter the living room by the beautiful bungalow front door, you see the dining room through the colonnade opening, making a very charming and home-like arrangement.

Thoughtful attention has been paid to the kitchen with its convenient built-in cabinets and well-lighted work table. Ample provision is made for the range.

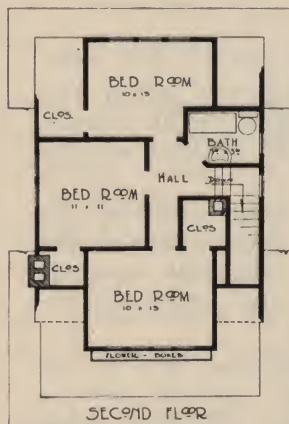

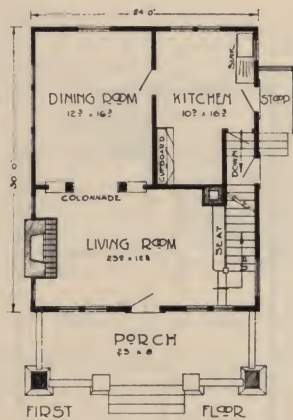

Now look at the step-saving arrangement of the two back bed rooms with bathroom, all opening on a small hall. The front bed room can be used either as a den or a sleeping room.

THE GRANDVIEW

No. 604—SIZE 24x30—8'-6" Ceiling first floor; 8' Ceiling second floor.

This house of striking outside appearance is just as pleasing inside.

Approaching the front door you notice the large inviting porch — and through the doorway you get a full view of practically the entire lower floor with the fireplace, the open stairway and the bookcase colonnade, all suggesting the refinement of the owner.

Then there is the well arranged kitchen—large enough for the average family for a breakfast room.

Going up the stairway you notice the convenient bathroom and three large bedrooms with dandy roomy closets.

Could you ask for any plan that is more attractive both from the outside and also from the standpoint of a genuine home?

THE MAPLEWOOD

No. 605—SIZE 22x30—8'-6" Ceiling first floor; 8' Ceiling second floor.

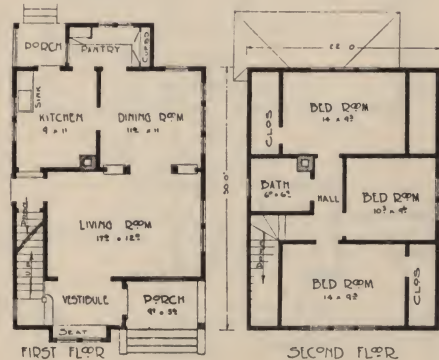

What a lot of room you get for such a small house.

This distinctive little house of original ideas is making many friends.

Take notice of the vestibule entrance with window seat and cased opening leading to the large living and dining rooms with an attractive book-case colonnade between.

Then the convenient pass pantry at the rear, with its handy cupboard and shelves, will delight every housewife.

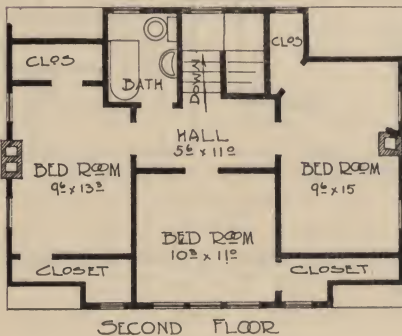

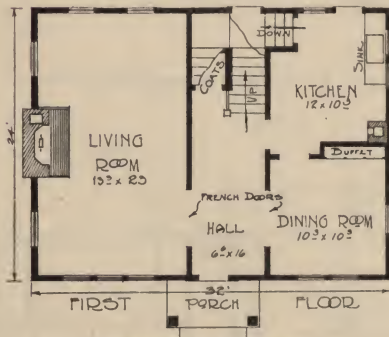

You'll see too that there is no waste space upstairs with the three large bedrooms and bathroom close at hand.

THE WOODLAWN

No. 606—SIZE 24x32—8'-6" Ceiling first floor; 8' Ceiling second floor.

Personality is shown by the home one lives in. Here is a Dutch Colonial house that will stand out among the conventional American houses of today, in showing the good taste of the owner.

It is artistic, roomy and very comfortable, and while it does not take much ground space every room is of good size.

Entering the hall you see the French doors on either side, one pair opening into the dining room and the other pair into the living room—with both thrown open you have one immense room for social gatherings.

Look at the convenience of the upstairs. Each bedroom has at least one good-sized closet.

As you look over this plan you can imagine just where you'll place each piece of furniture to make it look inviting and homelike.

### THE HILLSHADE

No. 607—SIZE 24x24—8' Ceiling first floor; 8' Ceiling second floor.

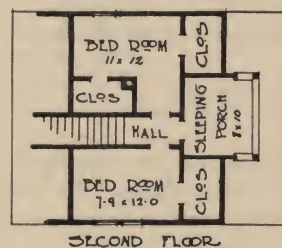

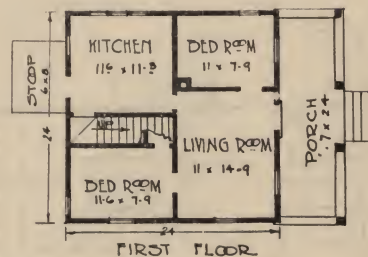

This is a modern story-and-a-half bungalow design especially planned for a suburban or country home.

The long sloping roof broken by the artistic dormer makes a pleasing outside appearance without any extremes in decoration.

Then the large front porch will provide many hours of comfort on hot summer days.

Inside you'll find it cozy and compact, with two sleeping rooms on the lower floor and two more on the upper floor; also that great modern convenience—a sleeping porch of comfortable size.

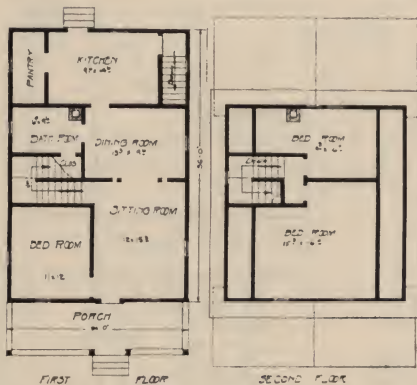

Quite a large family can be raised in comfort in this distinctive yet economical home.

THE ALDERWOOD

No. 608—SIZE 24x36—8'-4" Ceiling first floor; 8' Ceiling second floor.

This six room, story-and-a-half house is very popular.

It is a plan that is the first choice of many of our customers who want a modern, up-to-date home of moderate cost, but with all the conveniences so desirable now-a-days.

Approaching the house you'll like the appearance of the heavy brackets under the over-hanging eaves, giving the house a substantial look.

Then as you enter the living room you look into the dining room through the attractive colonnade.

The kitchen is roomy and can

be used for the family breakfast room.

Then notice the convenience of the bathroom and the often desired down-stairs bedroom.

The enclosed stairway leads to the two bedrooms on the upper floor, both of which are larger than generally found in houses of this size.

THE LAURELHURST

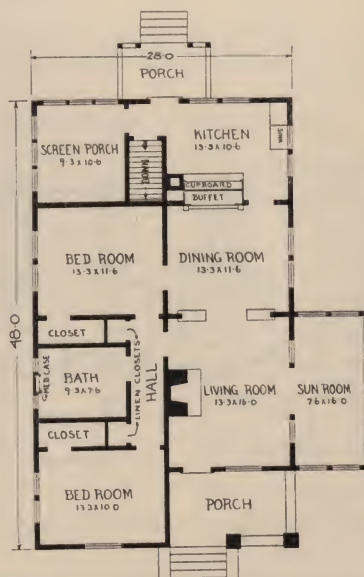

No. 701—SIZE 28x48—9' Ceiling.

There is something very restful and satisfying in this complete, modern home. You have only to look it over to see how it satisfies one's desires.

For winter use, it has a glass sun room which opens off of the living room through a French door with sidelights. Then the screened porch on the opposite side at the rear, is for summer use when shade and coolness are wanted. You see, too, the dining room has a built-in buffet at one end and a colonnade at the other—built to harmonize with artistic effect.

The sleeping rooms are conveniently arranged with ample clothes and linen closets so desirable in the opinion of the housewife to make a home complete.

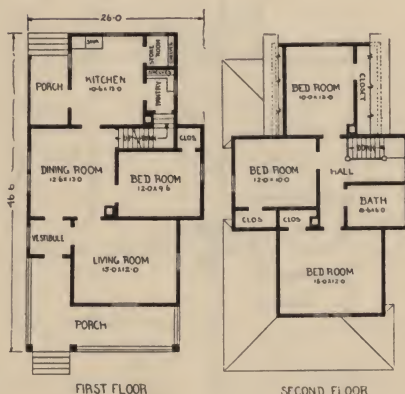

Could you ask for more conveniences to make an all-the-year home?

THE OAKES

No. 702—SIZE 26x40—8'-6" Ceiling first floor; 8' Ceiling second floor.

bedroom downstairs is oftentimes really needful when there is sickness in the home.

Here is one of the good old style houses—familiar to us all. All over the country you'll find them—their worth has been proven by long usage, and having stood the test of time, they will be built and used for many years to come.

The kitchen is well lighted by two large windows and a sash door—the busy country house-wife will find it well arranged for her work.

Then there's the convenient stairway to the upper floor, where there are three roomy bedrooms with closets and bath, all arranged so as not to lose an inch of floor space. The extra

THE SUNNYBROOK

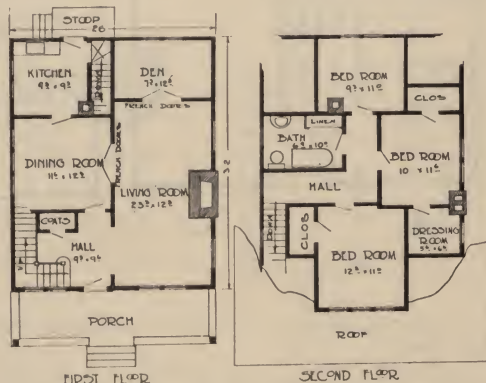

No. 703—SIZE 26x32—8'-6" Ceiling first floor; 8' Ceiling second floor.

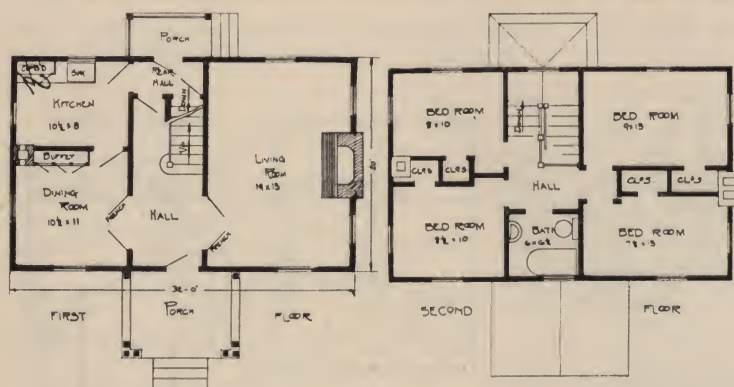

Do you recognize the design shown on our catalog cover?

At first glance you will see the simple straight lines are here made into a practical substantial home. See the heavy overhanging roof supported by substantial timbered brackets. The long roof slopes are broken by well proportioned dormers.

The inside arrangement is unique, as you will see when you step inside the door. The attractive open stairway — the handy clothes closet — den and dining room really an enlargement of the living room with its cheery fireplace, all speak of the home of your dreams.

The upstairs plan tells you it's own story of careful planning for convenience and satisfaction. This plan will meet every wish for the comfort and pleasure of many a home-loving family.

**THE SHADY  
NOOK**

No. 704—  
SIZE 20x32—9'  
Ceiling first  
floor; 8' Ceiling  
second floor.

Simple, square lines have here been transformed into a home of character, quality and taste.

Every part of this house has been planned toward giving the greatest of convenience and comfort for the lowest possible cost.

The large living room, hall and dining room can all be used as one large room for social occasions by throwing open the double French doors. Then when the family is alone, the use of the French doors give that coziness we all so desire.

Then look at the convenience of the second floor with four beautiful well-lighted bed rooms and the bath room.

It would hardly be possible to get a better plan. The room arrangement is just right.

THE GLENLOCHEN

No. 801—SIZE 28x42—8'-6" Ceiling first floor; 8' Ceiling second floor.

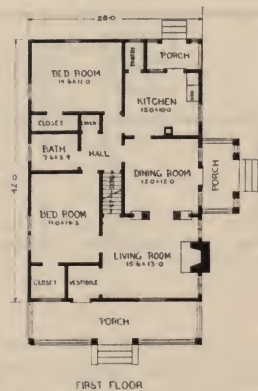

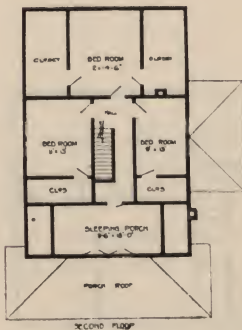

Here's the home for that big bunch of happy, growing, home-loving youngsters.

From every view it tells you that here you'll find real satisfaction and enjoyment in the family circle. The large front and side porches with substantial columns, heavy rails and balusters, the heavy brackets and barges all give the appearance of stability.

You can see that the daylight rooms are arranged for comfort and convenience, while every one of the sleeping rooms is well laid out with a roomy closet.

In addition, there's a sleeping porch with lots of room for those who must have the fresh crisp night air.

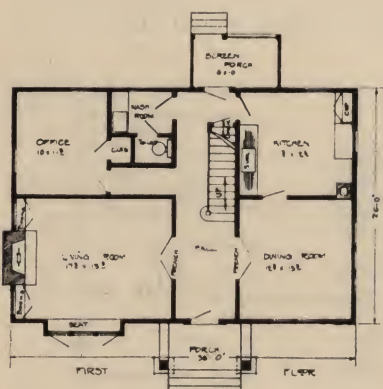

This house is certainly a credit to any owner and gives all the room needed by a large family.

THE SPRINGFIELD

No. 902—SIZE 26x36—9' Ceiling first floor;  
8'-6" Ceiling second floor.

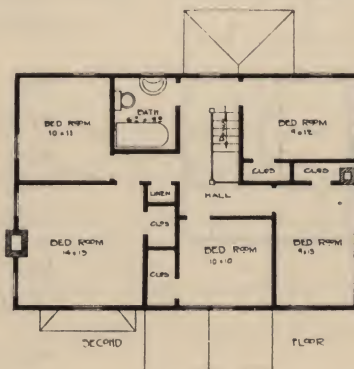

The up-to-date farm manager will be especially interested in this design, for it has been planned for the man that is progressive and thinks of the comfort of his family as well as the improvements to his farm.

Just look it over carefully and notice the extra conveniences—the farm manager's office, the handy wash room and toilet on the first floor, and the screened porch at the rear.

Then there are five well-arranged bedrooms and bathroom on the second floor.

After thinking about all these conveniences, can you imagine the comfort you would get in having a home like this on your farm?

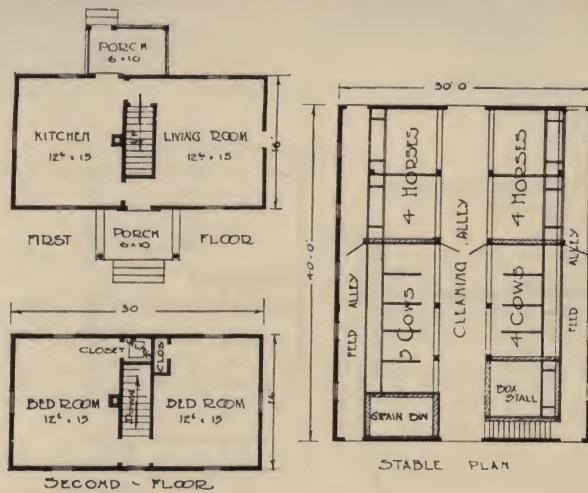

PRAIRIE LAWN

FARM OUTFIT No. 1

Our Farm Outfit No. 1 consists of a house and a barn.

House—16x30—4 rooms, 2 porches and a good light storage space in attic. Ceiling height first floor 9'-0", second floor 8'-6". Design No. 403.

SECOND FLOOR HOUSE #901

House No. 901  
Barn, B-6  
Hog Pen  
Granary

A Dutch Colonial house 32x24—8½' ceilings first floor, 8' second floor. These plans are well adapted for use by farmers. Good materials and the best construction.

The barn 32x46—16' is strongly built of the best grade of materials. Notice the unusual arrangement of the stable and the ease of feeding and handling the stock.

Granary—14x20. Hog Pen—16x24.

Write for any further information you may want about any of these buildings.

## THE HOLSTEIN

## GOTHIC BARN—36x64—12' Studs

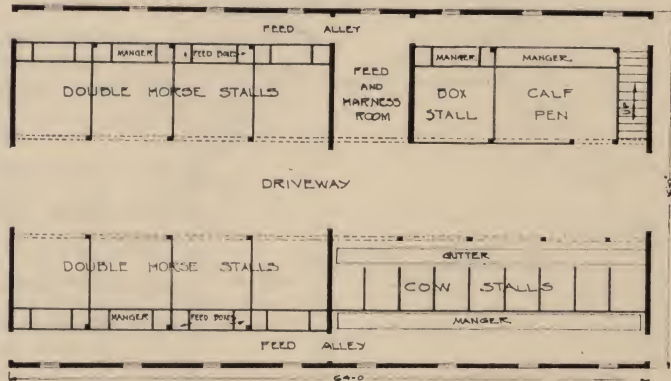

(See specifications below)

The Gothic Roof barn is rapidly becoming the favorite of the progressive farmer, because of its neat appearance, strong construction and, above all, its large and unobstructed mow space.

Many people are afraid of these barns because they have no roof trusses in them, while others fear that they are very hard to build.

These barns are really not any harder to build than the old style barn—they are just as strong and they cost no more.

If you are interested, write for further particulars—giving the size of the barn you intend to build.

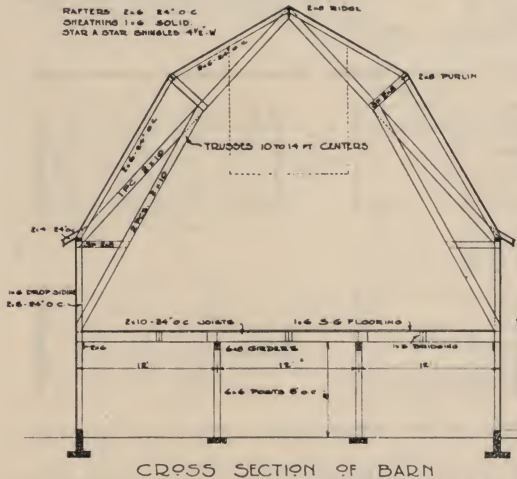

### SPECIFICATIONS

This barn 36x64—12' stud. All Dimension No. 1 Common; Extra \*A\* Shingles; 1x6 No. 2 Clear and Better Drop Siding; 2x6 Studs; 1x6 No. 3 Clear S. G. Flooring for mow floor; 2x10 Joists; Rafters bandsawed at the mill complete with sash and material for doors, cupalo, mangers and stall partitions as shown except cow stall fixtures.

THE JERSEY

CROSS SECTION OF BARN

### GAMBREL ROOF BARN

A high grade, low priced barn of good appearance and the strongest construction. Note the large mow space.

#### SPECIFICATIONS

All dimension No. 1 Common Fir; Posts, 6x6; Girders, 6x8; Joists, 2x10; Studs and Rafters, 2x6. No. 2 Clr. & Btr. Drop Siding. No. 1 Common solid roof sheathing. \*A\* shingles, 4 1/2" to weather. 1x6 No. 3 Clear S. G. Flooring for haymow floor. Sash in ends 8x10—4 lts.—on sides 10x12—4 lts.—complete with frames. O. S. finish, No. 3 Clear Fir.

#### COST OF BARNs COMPLETE

First determine the number of roof trusses you wish. These should be spaced from 10 to 14 feet apart; you will not need one in either end. In the table above you will find the price of each truss for the different width of barns. The price of the ends will also be found in the table. This price includes material for both ends complete with sash. Add to this the price of the sides—the price shown in the table is for each two feet of length in the barn. The total of these three items will give you the price of your barn f. o. b. Everett. Material for stable floors and stalls not figured.

Cupola Material \$15.35 Extra

## COMBINATION SCREEN AND STORM DOOR

The above illustration shows our combination screen and storm door.

The main part of the door is strongly built of old growth Douglas Fir and can be permanently hinged to the outside door frame. This does away with all the bother and annoyance of hanging and taking down a screen door and a storm door once every year.

The interchangeable feature consists of one panel as shown, glazed with double strength glass; and another panel fitted with galvanized wire screen, both of which are strongly built. Either one can be placed in the door and securely fastened without any tools in less than five minutes.

### COMBINATION DOOR:

3' 0"x7' 0"—\$11.50

2'10"x6'10"— 10.50

2' 8"x6' 8"— 9.75

### SCREENS

We can furnish Screens to fit windows and sash of any size, made either  $\frac{7}{8}$ " or  $1\frac{1}{8}$ " thick.

Our screens are mortised and tenoned and covered with either Black or Galvanized wire. In ordering be sure to say which thickness of sash and kind of screen wire cloth is wanted.

Price, per square foot, outside measure:

Black Wire Cloth, per square foot,.....18c

Galvanized Wire Cloth, per square foot.....20c

# FRENCH DOORS AND WINDOWS

This illustrates a room furnished with our French Doors and French Windows. These are becoming more popular every day in the better class of homes. French Doors between living and dining rooms are rapidly taking the place of colonnades as they make the home more

cozy and save heating two rooms when only one is to be used. French Doors and Windows are especially well adapted to the new ivory finish now so popular.

## FRENCH DOORS—Wood Stops

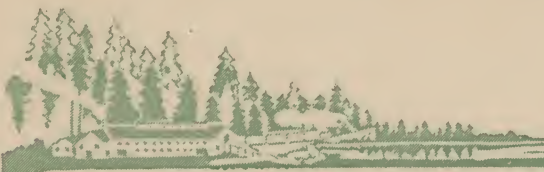

2'8"x6'8"—1 1/4".	Per pair	\$18.50
2'6"x6'8"—1 1/4".	Per pair	\$18.50

(Other sizes on request. Prices f. o. b. Everett, Wash.)

**BUFFET—B-71**

Width, 7'-6"  
Height, 6'-8"

A few dollars invested in good built-in fixtures will increase the value of the house many times the amount. This buffet is not only a very attractive piece of furniture but also a very useful one in any dining room. It has large slash grain 3-ply panels and a bevel plate mirror.

**PRICE \$83.50**

F.O.B. EVERETT, WASH.

**BUFFET—B-73**

Width, 6'-0"  
Height, 3'-6"

Here is a beautiful little fixture for the dining room. This buffet is to be built up against the dining room wall as a permanent fixture and is not designed as a portable buffet.

The graceful lines and excellent workmanship on this fixture will greatly improve the appearance of the room and add to the selling qualities of the house.

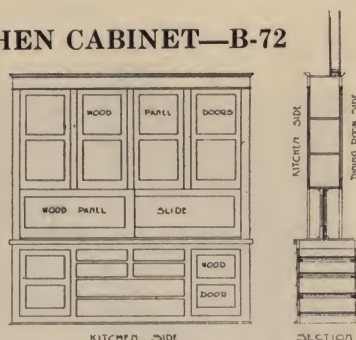

**PRICE \$53.50**

F.O.B. EVERETT, WASH.

NOTE:—These Buffets are built up and crated.

## COMBINATION BUFFET AND KITCHEN CABINET—B-72

Width 7' Height 7'

This fixture is designed as a pass pantry to be placed between the dining room and kitchen. The cupboards and drawers can be opened either from the kitchen or dining room. The slide can be opened so that materials may be passed through over the counter. A fixture like this increases the attractiveness of a room and also saves many steps.

PRICE \$96.00  
F.O.B. EVERETT, WASH.

## KITCHEN CABINET KC-81

Width 7' Height 7'

This is a very complete fixture for a kitchen. With a cabinet like this in the kitchen there is practically no need for a pantry. This cabinet is strongly put together, nicely finished and has a lot of room in it.

PRICE \$67.50,  
F.O.B. EVERETT, WASH.

EVERETT, WASH.

### KITCHEN CABINET—K.C. 83

Width 5' Height 7'

If there is not sufficient room in your kitchen to install the larger cabinet, we would recommend the use of this fixture.

It is well built, with lots of shelf space in the upper part and three good-sized drawers below the work-shelf, together with a mixing board, flour bin and cupboard.

This fixture will add greatly to the appearance and convenience of the kitchen.

PRICE \$55.00—F.O.B. EVERETT, WASH.

### KITCHEN CABINET KC-82

Width 3'-6" Height 7'

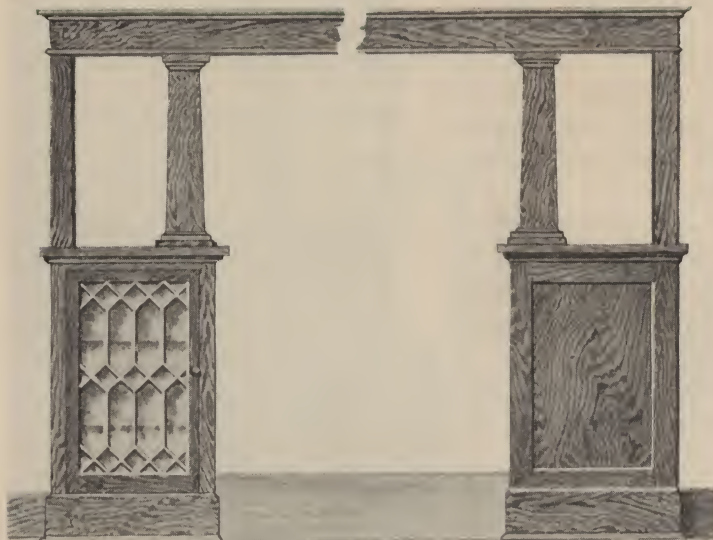

This is a smaller cabinet on the same style as the one above. It contains two glazed doors above the work-shelf and one door and three drawers below. There is also a mixing board which slides under the shelf. This is a very convenient little kitchen fixture.

PRICE \$46.00—F.O.B. EVERETT, WASH.

NOTE—These Cabinets are built up and crated

EVERETT, WASH.

COLONNADES

(Front) C-91 (Back)  
2'-0" WIDE. 4'-0" HIGH. 8" SQUARE COLUMNS.

This cut shows our regular book-case Colonnade. This is usually placed between the living room and the dining room, or living room and library.

The doors may be faced into the living room and the cases used for books or faced into the dining room and used as china closets. The back as shown on the right hand side has one plain panel.

With leaded glass doors—Price, up to 10 ft. wide, \$56.00—F.O.B. Everett, Wn.

On the left of this cut we show our high plain Colonnade C-92.

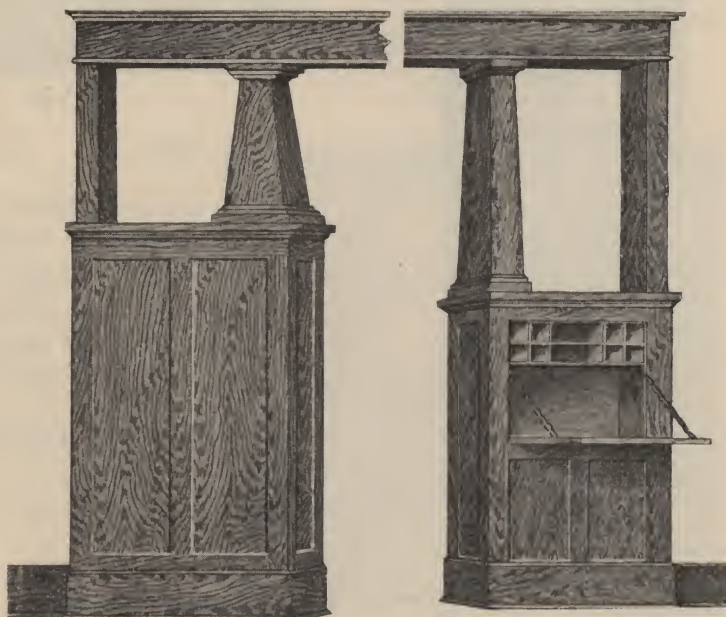

This can be furnished with one or two vertical panels as shown.

On the right is our Writing Desk Colonnade, C-93, containing a folding writing desk, a great convenience. The other case of this Colonnade is paneled up to match the desk when closed.

PRICE—Plain Colonnade C-92, up to 10' wide, ..... \$56.00

Writing Desk Colonnade C-93, up to 10' wide ..... \$68.50

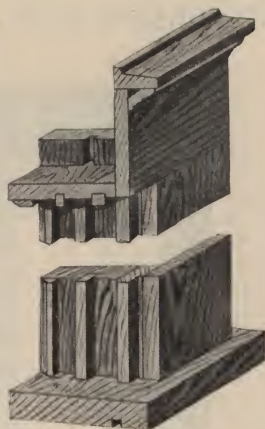

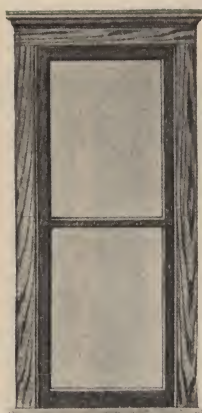

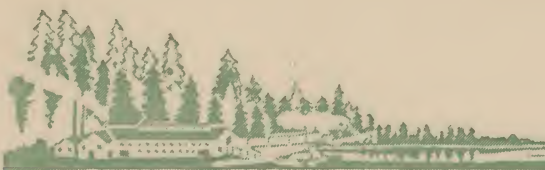

F.O.B. Everett, Wn.

C-92  
2'-8" WIDE—5'-0" HIGH.  
10" COLUMNS.

C-93  
2'-2" WIDE—4'-0" HIGH.  
8" COLUMNS.

 $7\frac{1}{4}$ " jambs for 2x6 studs..... 3.20  
 Single sash frames, up to 30"x 30", moulded head for 2x4 studs .....\$2.10  
 Same for 2x6 studs..... 2.35

### KNOCK DOWN DOOR FRAMES

Outside door frames, moulded head—

$5\frac{1}{4}$ " jambs for 2x4 studs.....\$2.90  
 $7\frac{1}{4}$ " jambs for 2x6 studs..... 3.25

### INSIDE DOOR FRAME

Inside door frames,  
 $5\frac{1}{4}$ " jambs .....\$1.35  
 Inside door frames,  
 $7\frac{1}{4}$ " jambs ..... 1.65

### NOTICE.

Our frames are all in the knock down, tied in separate bundles, and are made for 4 inch studding, sized.

Where not otherwise specified, all of our frames have  $\frac{7}{8}$ " outside casing. These frames are made so that  $\frac{7}{8}$ " storm sash, doors or screens can be used.

Mullion or twin frames are double the price of single frames. Triple frames are three times the price of single. Quadruple frames are four times, etc.

In ordering sash frames state whether sash are to be stationary or to open out or in.

All frames shipped in the knock down.

INSIDE DOOR AND WINDOW TRIM

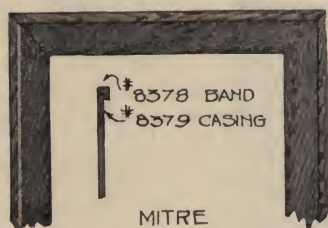

Door trim complete with or  
without Base Blocks,  
\$1.40 per side.

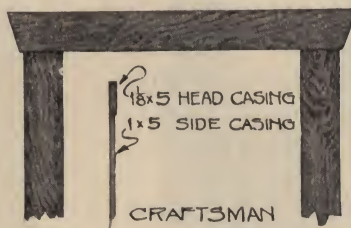

Window trim complete,  
\$1.40 per set.

Mullion or twin window finish,  
twice the price. Triple window  
finish, three times the price of  
single sets.

MITRE  
TRIM

15c more per side than Bull Nosed

CRAFTSMAN  
TRIM

Same price as Bull Nosed

We have only one grade of inside finish, and that the best  
—made from selected kiln dried old growth Yellow Fir. All our  
inside trim is machine sanded, thereby saving you a great deal  
of time and money.
